Key figures from Norwegian Aquaculture Industry 2022

Summary:

This report presents key figures from the Norwegian Aquaculture Industry. The report contains information about all species farmed in Norway. The information is in four groups. One group contains information about Atlantic salmon and Rainbow trout. Another group contains information about other fish species, a third group contains information about molluscs, crustaceans, and echinoderms and finally the fourth group contains information about algae.

The licenses for fish species, molluscs, crustaceans, and echinoderms are comprised of several species. In Table 5 licenses are counted several times. The total number of licenses in Table 5 is therefore higher than the total number of licenses presented in Table 4.

Total license capacity

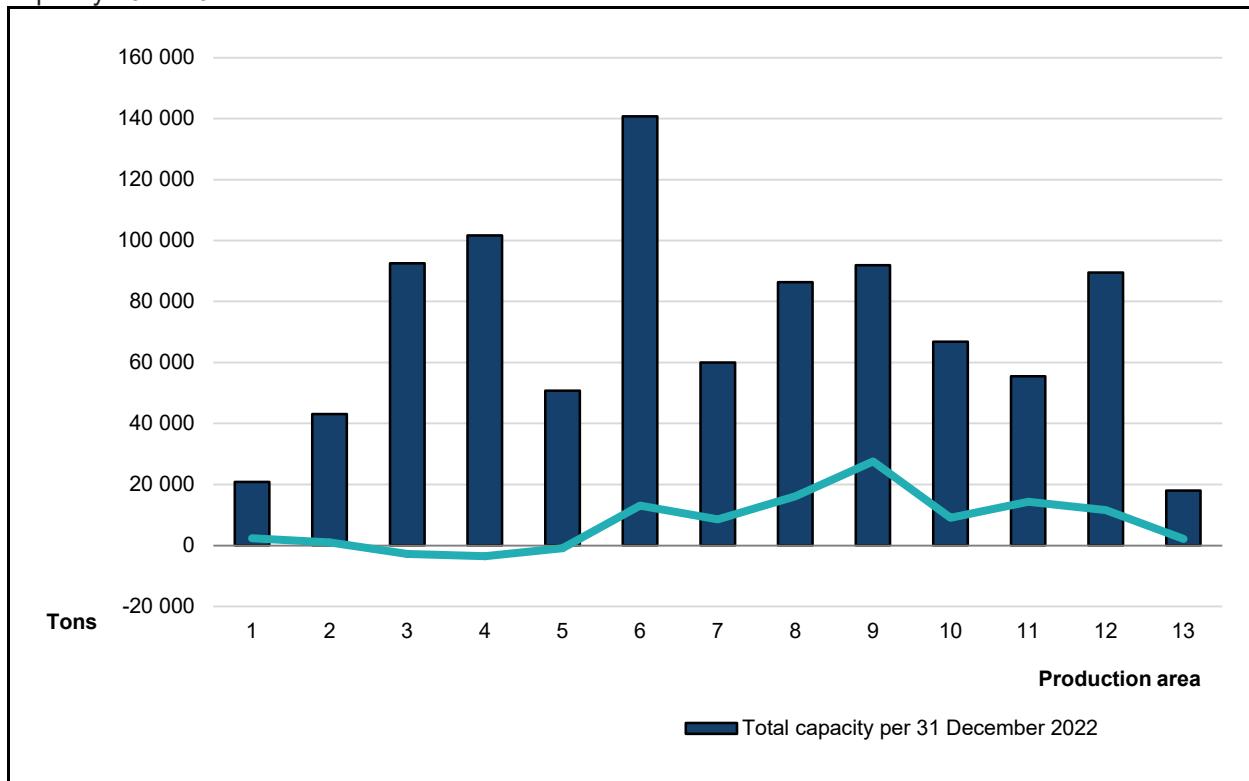

License capacity is maximum allowed biomass. Where biomass is the quantity of live fish at any given time (measured in kg or ton)
