

Map, showing the planned survey area for surveys in the Nordic Seas and Barents Sea in May 2016. The plan for the IESNS2017 survey will be similar, although possibly, the Faroese cruise tracks will also extend further eastward into Norwegian waters. The coordination of the surveys is within the ICES group WGIPS with participation of five parties: EU (DK), NO, IC, RU and FO. The Faroese R/V "Magnus Heinason" will cover the northern part of the Faroese area into international, Icelandic waters and possibly Norwegian waters (yellow lines east and north of Faroes on the map).
