## Cruise Summary

### General Information

Cruise	Tobisskrabetogt Rey
Research Vessel	REYKJA
Year and Quarter	4Q 2022
Country	Denmark

### Location and Time

	Date	Time
Departure	2022-11-17	00-00
Arrival	2022-12-10	00-00

### Participants

Name	Institute	Function tasks	Leg
<b>Leg 1</b>			
Jan Werner Thomsen	DTU-Aqua	Cruise-leader	1
Brian Werner Thomassen		Length measurements	1

## Objectives

- To describe the existence of fish in the waters surrounding Denmark based on their occurrence in scientific trawl./ At beskrive udbredelsen af fisk i farvande omkring Danmark ved brug af videnskabeligt trawl.
- To collect biological data regarding age, weight and maturity from subsamples of the catch from selected species./ At indsamle biologisk materiale vedr. alder, vægt og modenhed fra stikprøver fra fangsten af udvalgte arter.
- Recording of hydrographic data with CTD./Opsamling af hydrografidata med CTD.

## This Survey

During the cruise, apart from recording a complete set of factual information concerning haul information, gear performance, catch results, hydrographic information etc., the cruise leader keeps a logbook taking notes about circumstances (unusual gear performance, special catches, non-conformities etc. during the survey. The haul summary below is the overview from this logbook.

**Stations**

164 hauls were conducted during the survey. The positions off all hauls are presented in the map in Fig. 1.

**Weather Conditions**

No Remarks on the Weather conditions

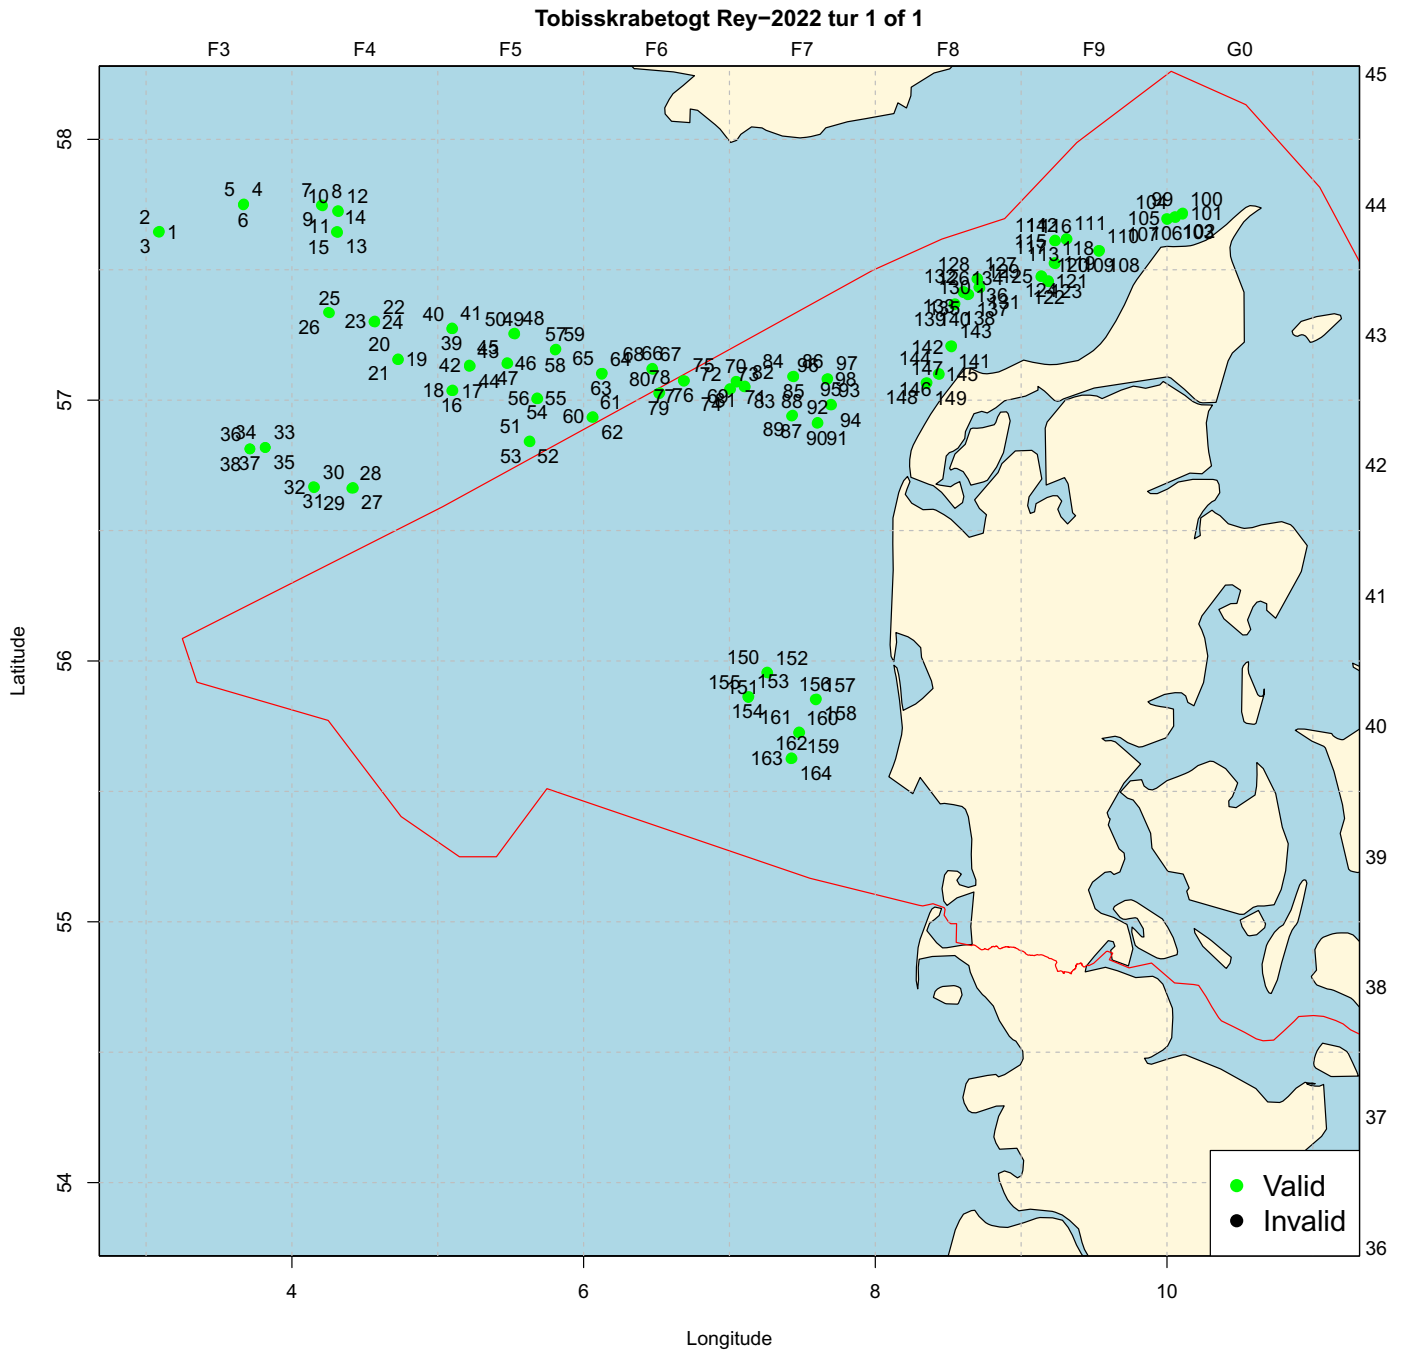

**Gear performance**

No remarks on the Gear performance

**Oxygen Conditions**

No remarks on the Oxygen conditions

## Catch Overview

Table 2: Sample Overview

	<b>Sub sampled [kg]</b>	<b>Total [kg]</b>	<b>Sub sampled [Nr.]</b>	<b>Total [Nr.]</b>	<b>Individuals collected</b>	<b>Genetics Sampled</b>
Total Catch	39.6	92.9	10935	24258	2333	0
<b>selected species</b>						
BRS	0	0	0	0	0	0
RSP	0	0	0	0	0	0
SIL	0	0	0	0	0	0
TNG	0	0	0	0	0	0
TOR	0	0	0	0	0	0
TBM	39.4	92.5	10755	24063	2333	0

**Length distribution**

**TBM**

## Species Caught

The total catch per species for the while cruise is presented in the table below.

Table 1: Arter fanget på tur 1

Latinsk navn	Dansk navn	Antal	Vægt (kg)
Syngnathus rostellatus	Lille tangnål	1	0.0
Gymnammodytes semisquamatus	Nøgentobis	191	0.3
Pomatoschistus	*Sandkutlinger	3	0.0
Hyperoplus lanceolatus	Plettet tobiskonge	1	0.0
Ammodytes marinus	Havtobis	24063	92.5
